- 1. A voice activated Hypermedia system using grammatical metadata, said system comprising:
  - a. a speech user agent;
  - b. a browsing module; and
  - c. an information resource.
- 2. The system of Claim 1, wherein said system further includes embedded intelligence in hypermedia source.
- 3. The system of Claim 2, wherein said system further includes a means for processing the actions of a user based on said embedded intelligence.
- 4. The system of Claim 3, wherein said system further includes a means for returning a result of said actions to said user.
- 5. The system of Claim 2, wherein said hypermedia source is a HTML page.
- 6. The system of Claim 1, wherein said system further includes an instructional module for communicating allowed actions by a user.
- 7. The system of Claim 2, wherein said embedded intelligence is a grammar.
- 8. The system of Claim 2, wherein said embedded intelligence is a reference to a grammar.
- 9. The system of Claim 7, wherein said grammar is dynamically added to a speech recognizer.
- 10. The system of Claim 3, wherein said actions come from a speech recognizer.

- 11. A voice activated Hypermedia system using grammatical metadata, said system comprising:
  - a. a speech user agent;
  - b. a browsing module;

- c. an information resource;
- d. a means for extracting a grammar from a hypermedia source for future reference to said source;
  - e. a means for modifying said grammar; and
- f. a means for automatically producing an intelligent grammar from said information resource; and
- g. a means for processing said grammar to produce a reference to said hypermedia source.
- 12. The system of Claim 11, wherein said system further includes a means for tokenizing a title for addition into said grammar.
- 13. The system of Claim 11, wherein said system includes a means for dynamically adding said grammar to a speech recognizer.
- 14. A voice activated Hypermedia system using grammatical metadata, said system comprising:
  - a. a speech user agent;
  - b. a browsing module;
  - c. an information resource; and
- d. a means for producing a grammar from textual representation of links to said information resource.
- 15. The system of Claim 14, wherein said system further includes a means for recognizing sentences from said grammar to follow said links to said information resource.
- 16. The system of Claim 14, wherein said system further includes a means for adding said
